Community Energy Event

Tuesday October 15th, 11am – 5 pm
@ the Cultural Centre

In March 2022 DGG signed a funding agreement with Natural Resource Canada, under Phase 3 of the Off Diesel Initiative. With this funding DGG will be working with Gonezu Energy Inc. to develop a community energy plan and **we want to hear from you!**

Goals of this event:

1. Provide an update to the community on the project funding and hear from community members about their questions, comments, concerns and goals to address climate change, energy production and uses (heat & electricity) for the community;
2. Provide FREE Home Energy Efficiency Kist for home owners and have your name entered into a draw to have 1 of 10 wood stoves installed in your home for FREE or other fabulous door prizes.
3. To promote and encourage community members to apply to serve on the Deline Energy Committee (DEC)

There will lunch served at 12noon with snacks, drinks, coffee and tea available throughout the afternoon

There will be additional fabulous door prizes to be won!

you will need to be present to win the door prizes

If you have any questions about the event please contact Jason Collard from Gonezu Energy at jason@gonezu.ca
